B. Deputy Assistant Secretary of State Clyde Taylor presented an overview of the recent Vienna UNCNB Conference and reported that there is support for increased emphasis on initiatives to control cocaine use in Italy, Sweden, Norway, Spain, and Peru. Italy insisted that crop substitution will not work unless governments comply with treaty obligations. Conference resolutions on drug mislabeling, ship registration, and amendments to the Psychotropic Convention were passed. Other issues under consideration included the possibilty of an UNFDAC Donor Meeting. DAS Taylor said the current position on the Single Convention on Narcotics and the Psychotropic Convention is to address inadequacies in both and amend the treaties through concensus procedures. Action programs continue on demand reduction, transit problems, scientific research, opiates supply, and the area of illicit drug reduction.

| of CIA discussed her recent trip to Colombia. Indicated that there is an unexplained Colombian cocaine market glut without an accompanying US retail price reduction, and suggested that a warning assessment should be considered if the situation continues for the next six to twelve months or less. Interest may also be focused on rather incomplete information that local insurgents are becoming more involved in narcotics trafficking and may have used profits to expand bases and arms inventories. US mission officials concurred that Colombian narcotics eradication programs and plans finish low on a list of President Betancur's priorities. Of primary concern are economic considerations, domestic security/common crime. Foreign relations, and a continuation of present policies. In noted that the most promising approach to narcotics control in the area involves steps to improve intelligence to permit seizure of large shipments, action against drug financing outside the country, more emphasis on implementation of treaties to extradite offenders to the US, and for the US "to set an example." III. Plans for Interagency Work A. John Wiant of State spoke on a possible estimate to address the significance of the European Cocaine situation. Mr. Wiant and other representatives suggested that principle trafficking routes into Europe be considered along with a focus on links to international organized crime. Possible European terrorist connections and the implications of bi- and multi-lateral US aid programs were also mentioned. B. CIA discussed the outline for a primer on collection of financial flow information and exploitation of reasony plan to complete the project by early April. Current views for major emphasis include: total revenue from illicit drugs sales, recipients of prooffits, methods by which revenues are laundered, and exotic methods of transfering funds. The aim is to explain how financial flows move so that field collectors from DEA, CIA and others can attack vulnerabilities in the system. | · | |
